

Price Guide

We don't have set prices or packages but can give an indication of price ranges to help couples get a rough idea of potentially costs of flowery items. Please bear in mind that there are lots of things that may affect the final price of an item, including the flowers chosen, size/fullness, amount of greenery used and the style chosen.

Also we don't charge for initial consultation or development of proposals, but this is incorporated into the costs of the items below, alongside the time to finalise the proposal, develop and finalise the flower order, pick up and condition the flowers and the design, creation and packaging of all the flowers.

There may be additional costs of set up of items and installations at the ceremony and reception venue, and delivery of the bridal party flowers, which would be quoted once the we know the details and exact items required. If a quote is given over 6 months in advance of the date of the wedding, the costs may vary when the final consultation is carried out. This is due to the cost of the flowers varying due weather conditions and availability and also in light of potential economic conditions and the impact of increased cost of imported flowers (particulary post May 2019).

We believe each bride and grooms requirements are different and want to work closely with you to make the right suggestions for you, your style and within your budget. We don't have a minimum spend and are happy to create flowers for any size wedding.

Below are the current price ranges for common wedding flowers:
